The proposed design project involves widening the roadway along State Route 86 (also referred to as Ajo Highway) between Valencia Road and Kinney Road. The purpose of the project is to enhance safety, improve traffic flow and meet current and future traffic needs along this segment of SR 86.

The SR 86 (Valencia Road to Kinney Road) project design phase began in October 2011 and is expected to last approximately 18 months. The new design will be consistent with the Final Design Concept Report and Environmental Assessment, which were finalized in the summer of 2010. The construction project, estimated at \$45 million, is expected to begin in the year 2013.
