The Mel and Enid Zuckerman College of Public Health (MEZCOPH) at the University of Arizona (UA) invites applicants for a postdoctoral researcher position in Indigenous health in the Department of Community, Environment and Policy with Dr. Stephanie Russo Carroll.

Candidates with interests and research portfolios in public health issues that affect Indigenous populations locally, nationally, or globally will be considered. Skill and content expertise in Indigenous health can be in diverse areas. However, we are particularly interested in candidates pursuing research foci in Indigenous governance, Indigenous data sovereignty, and health policy.

The postdoctoral researcher will be expected to work collaboratively with other university departments, state, tribal, and local entities, and national and global organizations. At the direction of the faculty mentor, the postdoctoral researcher will participate in the teaching and development of Indigenous health courses and curriculum, and designated health policy activities with Dr. Carroll's Indigenous Data Sovereignty and Governance Research Team

Duties and Responsibilities

- Research and write about tribal and other institutional research policies and practices.
- Write proposals for funding to develop, implement, and evaluate tribal and other institutional health policies and practices, with emphasis on Indigenous data sovereignty, mixed methods, and data science.
- Participate as directed in other primary and secondary research on governance and public health among Indigenous nations in the United States and elsewhere.
- Co-develop and teach courses in Indigenous health.

Minimum Qualifications

- Doctoral degree in public health or social, behavioral, biological, or health sciences disciplines with relevance to the position description and requirements.
- Experience writing journal publications on Indigenous governance, health, community development or related activities.
- Experience carrying out qualitative and quantitative research on Indigenous health and socio-economic policy, governance, and tribal and federal Indian policy.
- Substantial familiarity with American Indian policy in the United States.
