## Drywall Texture

<b>Job title:</b>	Texture
<b>Reporting to:</b>	Crew Lead / Foreman / Site Superintendent
<b>Salary:</b>	\$28.00 - \$30.00 per hour
<b>Schedule:</b>	Monday – Friday / 40 hours per week / Full-Time
<b>Location:</b>	Varies (Surrounding Tucson, Sells, Green Valley, Oro Valley, Sahuarita, Vail, Sierra Vista)

### Job Summary

We are seeking a skilled Drywall Hanger to join our construction team. The ideal candidate will have a strong background in drywall installation and finishing, with the ability to work efficiently on various construction sites. This role requires attention to detail and a commitment to delivering high-quality workmanship.

### Duties

- Install drywall panels on walls and ceilings according to project specifications and blueprints.
- Measure, cut, and shape drywall panels using power tools and hand tools.
- Secure panels to the framing structure using screws or nails.
- Apply tape and joint compound to seams between drywall panels for a smooth finish.
- Ensure all installations meet safety standards and building codes.
- Collaborate with other construction professionals, including carpenters and concrete finishers, to complete projects efficiently.

## **Drywall Texture**

- Read and interpret schematics and blueprints to determine layout requirements.
- Ensuring tools and materials are properly stored.
- Maintain a clean and organized work area, adhering to safety protocols on construction sites.
- Assist in metal stud framing and door hanging as part of the overall construction process.

### **Qualifications**

- Proven experience as a Drywall Hanger or in a similar role within the construction industry.
- Proficiency in using power tools and hand tools related to drywall installation.
- Knowledge of frame carpentry, plaster application, concrete finishing, and forming is preferred.
- Ability to read blueprints and schematics accurately.
- Experience with heavy equipment operation is a plus.
- Strong attention to detail with a commitment to quality workmanship.
- Excellent problem-solving skills and the ability to work under pressure.
- Physical stamina for lifting heavy materials and standing for extended periods..
- Ability to work effectively in a team environment while also being self-motivated.
- Knowledge of construction site safety practices and procedures is essential.
- Previous experience with metal stud framing and door hanging will be considered an asset.

## Drywall Texture

By fulfilling these responsibilities, a skilled hanger ensures the building is structurally sound and meets project specifications.

## **Drywall - Labourer**

<b>Job title:</b>	Labourer
<b>Reporting to:</b>	Crew Leader / Foreman / Site Superintendent
<b>Salary:</b>	\$17.00 - \$22.00 per hour
<b>Schedule:</b>	Monday – Friday / 40 hours per week / Full-Time
<b>Location:</b>	Varies (Surrounding Tucson, Sells, Green Valley, Oro Valley, Sahuarita, Vail, Sierra Vista)

### **Job Summary**

A Labourer is responsible for performing a variety of manual tasks on construction sites to support the overall progress of projects. Duties include assisting with site preparation, material handling, operating hand and power tools, tool maintenance, and ensuring job sites are clean and safe. The role requires working closely with other construction professionals to carry out tasks as needed. A strong understanding of safety protocols, the ability to lift heavy materials, and the willingness to learn and follow directions are essential for success in this position.

### **Responsibilities**

- Perform carpentry work in accordance with safety standards
- Utilize power tools
- Assist with erecting structure, including floors, walls, ceiling, and roofs.
- Assist with maintenance and repairs as needed on job site, tools, and equipment

## Drywall - Labourer

- Caulk gaps and joints to ensure airtight structures

### Key Skills Required:

- **Physical Strength and Endurance:**
  - The role often requires lifting heavy materials, standing for long periods, and working outdoors in various weather conditions.
  - Good hearing and sight.
  - Ability to lift up to 50 pounds in weight, pushing, pulling or carrying objects, using abdominal and lower back muscles to provide support over time without fatigue.
- **Mathematical Skills:** A good understanding of measurements, geometry, and basic math is essential for cutting materials accurately and ensuring proper alignment.
- **Problem-Solving Abilities:** Laborer needs to be adaptable and capable of making quick decisions and modifications during construction.

### Experience

- No Experience necessary

### Qualifications

- Must be 18 years of age

## **Drywall - Labourer**

By fulfilling these responsibilities, a laborer ensures the job site meets project safety protocols and deadlines in a timely manner.

## **Metal Stud Framer**

<b>Job title:</b>	Metal Stud Framer
<b>Reporting to:</b>	Crew Leader / Foreman / Site Superintendent
<b>Salary:</b>	\$25.00 - \$35.00 per hour
<b>Schedule:</b>	Monday – Friday / 40 hours per week / Full-Time
<b>Location:</b>	Varies (Surrounding Tucson, Sells, Green Valley, Oro Valley, Sahuarita, Vail, Sierra Vista)

### **Job Summary**

A skilled framer plays a critical role in construction projects, strong background in various carpentry techniques and be able to work independently as well as part of a team. This role involves working on diverse projects, including residential and commercial construction, restoration, and remodeling. The framer will be responsible for delivering high-quality workmanship while adhering to safety standards and project timelines:

### **Roles and Responsibilities:**

- **Reading and Interpreting Blueprints and Plans:**
  - Skilled framers must accurately read and interpret architectural and engineering blueprints, diagrams, and project plans to ensure that framing aligns with the overall building design.

## **Metal Stud Framer**

- They also calculate dimensions and ensure the correct placement of walls, windows, doors, and other structural elements.
- **Constructing the Framework:**
  - Framers are responsible for building the skeleton of a structure, including floors, walls, ceilings, and roofs. They typically work with wood, steel, or prefabricated materials to construct the framework.
  - This involves cutting and assembling timber, plywood, or other materials to create frames for walls, roofs, and floors.
- **Measuring and Cutting Materials:**
  - Using precision tools such as saws, measuring tapes, and levels, framers measure and cut building materials to the correct size and shape. Accuracy is key to ensure that the structure is level, plumb, and secure.
- **Assembling Frames:**
  - Framers assemble and secure framing components using nails, screws, bolts, or other fasteners. They may also install metal studs or prefabricated sections depending on the building specifications.
- **Installing Support Systems:**
  - In addition to basic framework construction, skilled framers install critical support systems such as beams, joists, trusses, and rafters. This work requires knowledge of load-bearing structures to ensure the building's stability and strength.

## Metal Stud Framer

- Sometimes, on-site issues arise, such as design changes or unforeseen obstacles. Framers need to make adjustments or modifications to the framework while maintaining structural integrity.
- **Maintaining Tools and Equipment:**
  - Skilled framers are responsible for maintaining their tools, ensuring that saws, drills, levels, and other equipment are in good working condition for efficient and precise work.

### Key Skills Required:

- **Attention to Detail:** Framers need excellent precision and accuracy to ensure the structural integrity of the building.
- **Physical Strength and Endurance:** The role often requires lifting heavy materials, standing for long periods, and working in various weather conditions.
- **Mathematical Skills:** A good understanding of measurements, geometry, and basic math is essential for cutting materials accurately and ensuring proper alignment.
- **Problem-Solving Abilities:** Framers need to be adaptable and capable of making quick decisions and modifications during construction.

By fulfilling these responsibilities, a skilled framer ensures the building is structurally sound and meets project specifications.
