Metal Roofer Journeyman Job Description

Global Roofing Group is a leading global roofing contractor providing services to commercial, industrial and apartment buildings. In operation since 1971, we have worked with every roof system and application.

Job Summary:

A Metal Roofer Journeyman is an experienced professional in the roofing industry specializing in metal roofing systems, such as installation of metal roofs, wall panels, metal roof flashing, etc....

Duties/Responsibilities:

Installation: They are responsible for installing, repairing, and maintaining metal roofing systems on, commercial, or industrial buildings.

Material Handling: Journeyman metal roofers handle and transport metal roofing materials and tools safely.

Roof Inspection: They inspect roofs to assess the condition, identify issues, and recommend necessary repairs or replacements.

Safety: Ensuring compliance with safety regulations and using safety equipment to prevent accidents.

Blueprint Interpretation: Understanding and working from architectural plans and drawings to accurately install roofing systems.

Cutting and Shaping: Cutting, shaping, and welding metal sheets to fit the roof structure.

Waterproofing: Applying sealants and waterproofing materials to prevent leaks.

Quality Control: Maintaining high standards of workmanship and ensuring the roofing system is weatherproof and durable.

Teamwork: Collaborating with other construction professionals, such as contractors and builders, to complete roofing projects.

Problem Solving: Identifying and resolving issues that may arise during installation, such as leaks or structural problems.

Tools and Equipment: Operating a variety of tools and equipment, including power tools and welding machines.

Customer Interaction: Communicating with clients to provide information, updates, and recommendations.

Physical Requirements:

- Ability to stand, squat, climb, bend, kneel, stoop, walk, push, pull, crouch and crawl for long periods of time.
- Ability to travel up and down ladders and lift up to 50lbs on a regular basis.
- Ability to work in high places and in tight spaces (crawl space).

Education and Additional Requirements

- *High school diploma or equivalent preferred but not required.*
- Experience with various commercial roofing systems
- Must have reliable transportation and basic tools.
- OSHA 10 Hr. or 30 Hr. course completion a Major plus.

All other duties as assigned.

Metal Laborer Job Description

Global Roofing Group is a leading global roofing contractor providing services to commercial, industrial and apartment buildings. In operation since 1971, we have worked with every roof system and application.

Job Summary

The metal laborer is responsible for various tasks related to working with metal materials. May also include the removal of roofing systems, job site cleanup, architectural metal panel installation, preventative maintenance, soffit, and fascia installation.

Duties/Responsibilities

Metal Fabrication: Cutting, shaping, and forming metal components using tools such as saws, shears, and presses.

Welding: Joining metal parts together using welding techniques, including MIG, TIG, or arc welding.

Assembly: Assembling metal parts and components to create finished products or structures.

Blueprint Reading: Interpreting technical drawings and blueprints to understand project specifications and dimensions.

Measuring and Precision: Taking precise measurements and ensuring that metal components meet required specifications.

Material Handling: Moving and lifting heavy metal materials and products safely.

Safety Procedures: Following safety protocols to minimize the risk of accidents and injuries while working with metal.

Maintenance: Performing basic maintenance on metalworking tools and equipment to ensure they function correctly.

Quality Control: Inspecting finished metal products for defects and ensuring they meet quality standards.

Problem Solving: Identifying and resolving issues that may arise during the metalworking process.

Collaboration: Working with a team to complete projects efficiently and meet deadlines.

Physical Requirements:

- Ability to stand, squat, climb, bend, kneel, stoop, walk, push, crouch, and crawl for long periods of time.
- Ability to travel up and down ladders.
- Ability to lift up to 50lbs on a regular basis.
- Ability to work in high places and in tight spaces (crawlspaces).

Education and Experience

- High school diploma or equivalent preferred but not required.
